129 Years Strong — And So Are Our Valves.

Since 1896, John Valves has been supplying durable, field-proven valve solutions built to endure the harshest Australian conditions. Our legacy isn't just in how long we've been around — it's in how long our valves stay in service.

JOHN 1050mm Gate Valve

OUR HISTORY

Committed to Quality,
Dedicated to You —
Valve Specialists Since
1896

John Valves originates from humble beginnings in 1896. Since then, we have established ourselves as one of Australia's leading valve manufacturers, suppliers and reconditioning specialists. We are committed to delivering quality, cost-effective products whilst providing comprehensive, personalised service.

To ensure quality control, all our skilled manufacturing and engineering personnel have extensive industry experience. At John Valves, we service a wide range of industries, from small rural installations to large multinational companies involved in the petrochemical or process industries.

Vision

To be global leader in valve manufacturing and supply renowned for exceptional quality innovative solution and unwavering commitment to customer satisfaction.

Mission

We are committed to delivering quality and reliable valves exceeding customer expectations whilst prioritising safety and environment sustainability.

Future-Focused, Legacy-Driven

Message From Our Managing Director

Dear Valued Stakeholders,

Thank you for the opportunity to present the capabilities of John Valves Pty Ltd. Our trajectory as a leading Australian valve manufacturing company has been characterised by unwavering dedication and an uncompromising commitment to excellence. Tracing our origins back to 1896, our enduring legacy is a testament to our profound passion for innovation and an unrelenting pursuit of quality.

At John Valves, our capabilities transcend the mere creation of products. Our capability mirrors our advanced manufacturing processes and upholds our core values of integrity, innovation, and ethical practices. We are not solely engaged in producing valves; instead, we are dedicated to establishing enduring partnerships and delivering solutions that exceed expectations.

The driving force behind our long-lasting success has always been our exceptional team. Their unwavering dedication and expertise have driven us to a leadership position within the industry. Looking to the future, we are inspired by the team's ambition to continually push the boundaries of what is achievable in valve manufacturing.

Our commitment to innovation remains relentless. We will embrace emerging technologies, materials and manufacturing methodologies to ensure our products consistently meet and surpass industry standards. We will continue to invest in our personnel, fostering their talents and equipping them with the necessary tools for excellence. It is also our mission to train the next generation of manufacturers and engineers. We are committed to adapting to the evolving needs of our customers and the dynamic landscape of our industry.

Our capabilities not only reflect our historical achievements but also provide a glimpse into the future. We take pride in our accomplishments thus far and eagerly anticipate the journey ahead. We invite you to collaborate with us as we establish new benchmarks in Australian valve manufacturing.

Warm regards,

Todd Bertram

OUR WORK

Reliable Valve Solutions for Industry Success

At John Valves, our focus is on empowering your projects with valves that meet the highest standards of performance, safety, and durability. By partnering with a diverse range of industries — from major mining companies to municipal water utilities and chemical processors — we ensure your operations run smoothly and efficiently.

Here's a glimpse of how we've supported our clients' success through tailored valve solutions for critical projects:

Salt Lake Potash, Lakeway Project via GR Engineering

We supplied \$960K worth of manual and actuated valves.

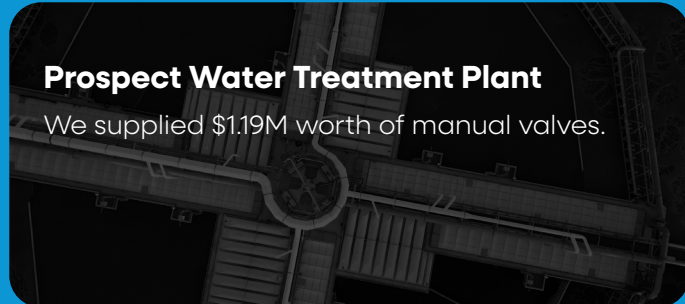

Talison, Greenbushes Lithium via Mondium

We supplied \$915K worth of manual and actuated valves.

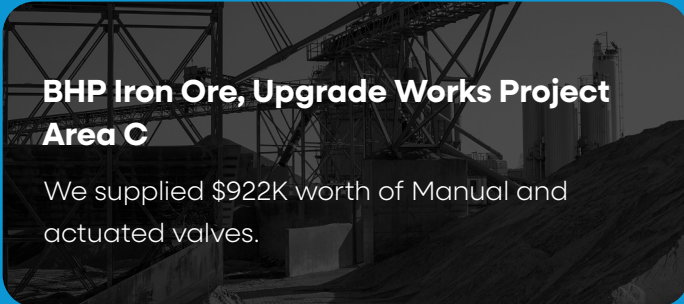

Southeast Water, Boneo Water Treatment Plant, via Suez Becker John Holland JV

We supplied \$820K worth of manual and actuated valves.

Prospect Water Treatment Plant

We supplied \$1.19M worth of manual valves.

BHP Iron Ore, Upgrade Works Project Area C

We supplied \$922K worth of Manual and actuated valves.

Kalgoorlie Nickel Smelter Project

We supplied \$805K worth of assorted steam valves.

Civmec, Mt Holland Lithium Project

This project included a wide range of valves — ball, gate, globe, check, butterfly, and plug — totaling \$1.81M.

FQML, Process Plant Reinstatement Project

We supplied \$2.5M worth of manual and actuated knife gate valves.

Our consistent commitment to excellence in valve manufacturing and delivery is underscored by these past accomplishments, making John Valves Pty Ltd. the trusted choice for valves in diverse industries.

Industry Focused Valve Solutions

- Water & Waste Water
- Power Generation
- Oil & Gas
- Mining & Processing
- Food & Beverage
- Hydrocarbon

John Valves specialises in industry-focused valve solutions designed to meet the unique demands of diverse sectors. Our range includes gate valves, globe valves, check valves, safety and relief valves, and more, all engineered for reliability and durability. Whether for water treatment, mining, oil and gas, or manufacturing, our valves are tailored to perform under specific operational conditions. With customisation options and a commitment to quality, we deliver solutions that ensure efficiency and dependability across industries.

Actuation Solutions

John Valves offers a comprehensive selection of actuators designed to meet the specific requirements of various industries. Our range includes electric actuators for precise control and automation, pneumatic actuators known for their rapid response and reliability, hydraulic actuators that provide high torque for heavy-duty applications, and solenoid actuators ideal for quick on/off operations. Each actuator is engineered to integrate seamlessly with our valves, ensuring optimal performance and durability. By providing tailored actuation solutions, we enhance operational efficiency and reliability across diverse industrial applications.

Wide Range of Valves for Australian Industry

We supply a wide range of valves for most industry needs. Some the most popular valves include:

- Air Valves
- Ball Valves
- Butterfly Valves
- Check Valves
- Diaphragm Valves
- Gate & Globe Valves
- Parallel Slide Valves
- Safety/Relief Valves
- and more

CORE COMPETENCIES

Valve Design and Engineering:

Our team of experienced engineers and designers excel in creating custom valve solutions tailored to meet the unique needs of our clients. We leverage the latest SolidWorks and simulation software to ensure.

Customisation:

We offer a high degree of customisation to meet the specific requirements of our clients. Whether it's modifying existing valve designs or creating entirely new solutions, our team is adaptable and ready to deliver tailored valve solutions.

Precision Manufacturing:

John Valves operates state-of-the-art manufacturing facilities equipped with cutting-edge CNC machinery and quality control processes. We specialise in producing valves of various types, sizes, and materials.

Timely Delivery:

We understand the importance of on-time delivery. Our streamlined production processes and efficient supply chain management ensure that our clients receive their orders within the agreed-upon timelines.

Material Expertise:

We have extensive knowledge of materials used in valve production, ensuring that our valves are durable, corrosion-resistant, and capable of withstanding extreme conditions. We work with a wide range of materials, including stainless steel, carbon steel, bronze, and exotic alloys.

Quality Assurance:

Quality is a pillar of our operations. Backed by certifications and compliance with relevant standards to adhere to quality control measures throughout the manufacturing process. This guarantees that every valve produced meets or exceeds industry standards.

In-House Capabilities:

In addition to our machining capabilities, we offer sand and bead blasting facilities for surface preparation and in-house painting capabilities, ensuring that our valves not only perform optimally but also meet aesthetic requirements when needed.

Manufacturing Facilities:

Our Ballarat-based manufacturing facility holds a wide range of equipment, including lathes, milling machines, vertical and horizontal borers, CNC lathes, radial arm drills, and slotting machines. With a wide range of machines at our disposal, we have the capability to produce a diverse range of valves to meet your requirements.

Customer Service:

John Valves, we have cultivated a culture of excellent customer service. Our commitment extends from valve selection assistance to offering competitive pricing, ensuring on-time delivery, and providing unwavering after-sales support.

Geographic Reach

John Valves Pty Ltd aims to reinvigorate the brand not only in Australia but also across New Zealand and the South Pacific. We are committed to providing top-quality valves and exceptional service to clients throughout this region.

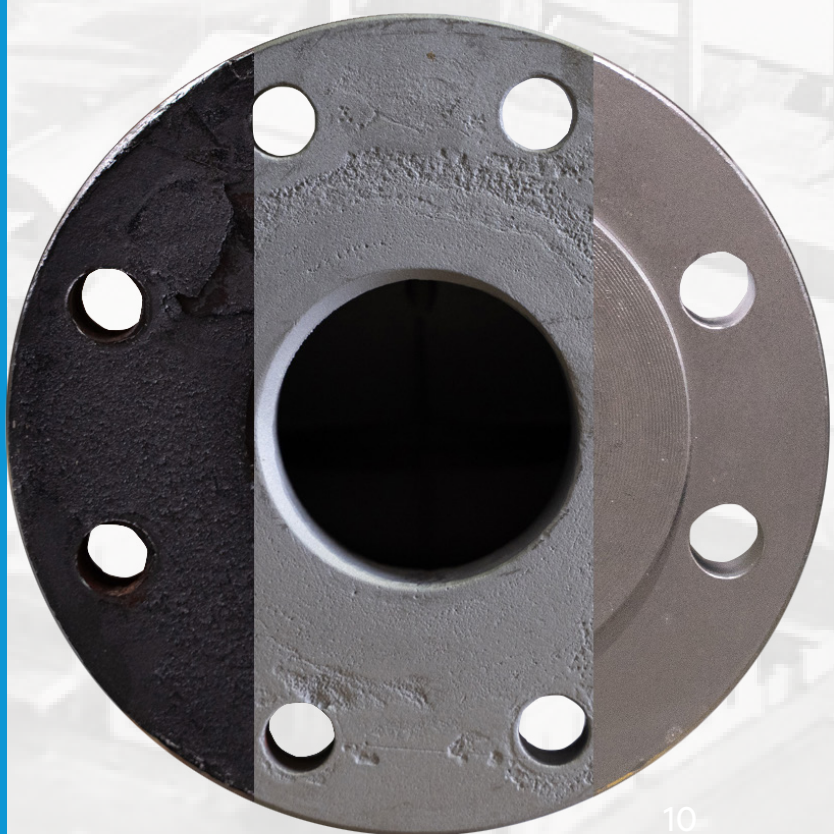

Staffing

John Valves Pty Ltd boasts a dedicated team of over 50 skilled professionals. Our staff is spread across our manufacturing facility in Ballarat, as well as our strategically located offices in Perth, Brisbane, Sydney and Melbourne, ensuring efficient service and support to clients across Australia.

Servicing & Reconditioning

Our reconditioning and repair services blend expertise with precision to ensure your industrial processes run smoothly and safely. Valves are not just components; they're the lifeline of your operations. Understanding this, we dedicate ourselves to maintaining your valves' health, ensuring they perform optimally, safeguarding against operational downtime and safety hazards.

CERTIFICATE OF REGISTRATION

This is to certify that the management system of:

John Valves Pty Ltd

Main Site: 19 Martin Drive, Delacombe, Victoria, 3356, Australia
has been registered by INTERTEK SAI Global as conforming to the
requirements of:

ISO 9001:2015

The management system is applicable to:

The sales, design, manufacturing and repair of fluid control valves for
industrial applications.

Certificate Number:

QMS40006

Initial Certification Date:

08 April 2013

Date of Certification Decision:

14 December 2023

Issuing Date:

04 January 2024

Valid Until:

01 February 2027

Work Health and Safety Policy

John Valves is committed to providing and maintaining a safe and healthy workplace for all workers (including contractors and volunteers) as well as clients, visitors and members of the public. Hazards and risks to health and safety will be eliminated or minimised, as far as is reasonably practicable.

The responsibility for managing health and safety ultimately rests with the person in control of the business or undertaking (PCBU), directors and management. Workers also have important responsibilities for health and safety in the workplace.

We are committed to complying with the *Work Health and Safety Act 2011*, the Work Health and Safety Regulation 2011, codes of practice and other safety guidance material.

Management will:

- Ensure the business complies with all legislation relating to health and safety.
- Eliminate or minimise all workplace hazards and risks as far as is reasonably practicable
- Provide information, instruction and training to enable all workers to work safely.
- Supervise workers to ensure work activities are performed safely.
- Consult with and involve workers on matters relating to health, safety and wellbeing.
- Provide appropriate safety equipment and personal protective equipment.
- Provide a suitable injury management and return to work program.

Employees will:

- Take reasonable care for their own health and safety.
- Follow safe work procedures, instructions and rules.
- Participate in safety training.
- Report health and safety hazards.
- Report all injuries and incidents.
- Use safety equipment and personal protective equipment as instructed.

Our goal is to provide a safe and healthy work environment that is free from workplace injury and illness. This will only be achieved through the participation, co-operation and commitment of everyone in the workplace.
